Annexure-7: Salient Aspect of Technical Proposal

The salient aspects of the technical proposal shall be described as follows:

1. Clarity on Completeness of Proposal

The bid for services must take full account, in content and form, the terms of reference and the conditions of the Proposal for services in the request for proposal. All the components of the Proposal for services that are required must be presented. Clarity in the Proposal means a clear structure, text statements supported with appropriate tables, lists and other editorial aids in accordance with the complexity of the terms of reference, and a balanced use of annexes to keep the main text clear and precise. If there are minor omissions in relation to the terms of reference, points will be deducted. Omissions that considerably restrict comparison with other Proposals can cause the *Applicant* to be excluded.

2. Approach & Methodology, Work Plan & Manning Schedule

The Proposal for services must present the methodological approach and the programme of work in such a way that their suitability in regard to the terms of reference can be assessed and they can be compared with **other** qualified Proposals. This includes a statement of the work organisation planned and the logistics. If there is an evident and considerable discrepancy between the terms of reference and the quantities given, the Proposal will not be considered. The text should state clearly how the task is to be proposed to be undertaken and the deployment schedule of staff. In case the key staff is to be supported by additional staff, the same shall be reflected in the approach and methodology. The work plan and manning schedule shall be provided in the form of bar chart. It must be supplemented with diagrams, tables and in case of complex work, appropriate graphics. **The approach and methodology to be covered under the following heads:**

- a. Understanding of the scope of work
- b. Proposed methodology of Consultant for undertaking the assignment
 - i. Deployment of staff and logistics
 - ii. Technical approach
 - iii. Methodological framework for Supervision and Monitoring.
